

Security Advanced (MDR Ultimate)

Subscription-based Cybersecurity Services

Combat ransomware and advanced cyber threats with human-led security operations from an ISO 27001 certified SOC.

[Get Started](#)

Service Description

The Advanced Security Service delivers enhanced visibility and industry leading technology to stop ransomware and advanced cyber threats - even those that might leverage unknown security vulnerabilities.

Get around the clock protection from a team of certified security engineers in an ISO 27001 SOC - this is the gold standard for information security management and operations.

The result is a service that delivers lightning fast threat detection and response times for security events across endpoints, networks and cloud services.
